# Form Validation & Styling

Today's Lesson

- Recap: HTML input forms
- Validation basics
- Styling forms
- Practical activity

# Why Validate Forms?

- Prevent wrong data
- Improve user experience
- Secure your website

# HTML5 Validation

Use built-in attributes:

- required
- minlength / maxlength
- pattern
- type=email/number

# JavaScript Validation

- More control over validation
- Custom error messages
- Validate before submitting

# Styling Forms

- Make forms user-friendly
- Highlight focus states
- Improve readability

# Practical Activity

Create a SIGN-UP FORM with:

- Full Name
- Email
- Password + Confirm Password
- Validation + Styling

# Mini Challenge

Add a phone number field:

- Must be 10 digits

- Use pattern attribute

# Homework

Create a CONTACT FORM with:

- Name, Email, Subject, Message

- Add validation & styling
